Management

Irillic .nm Fluorescence Imaging System

Irillic .nm is a state-of-the-art, multi-application, fully-integrated NIR fluorescence imaging system.

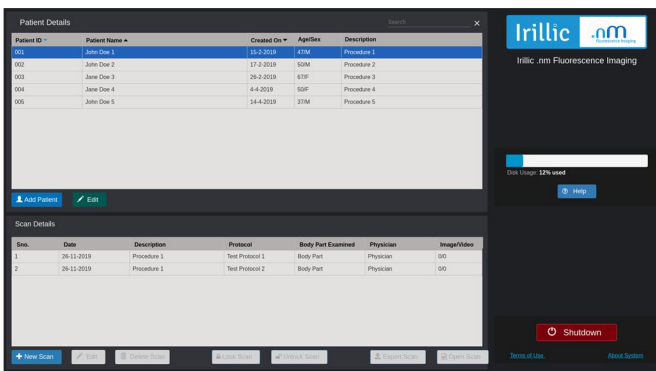

It helps in:

- visualization of lymphatic flow,
- visualization of blood flow, and
- visualization of parathyroid glands by autofluorescence (without ICG)

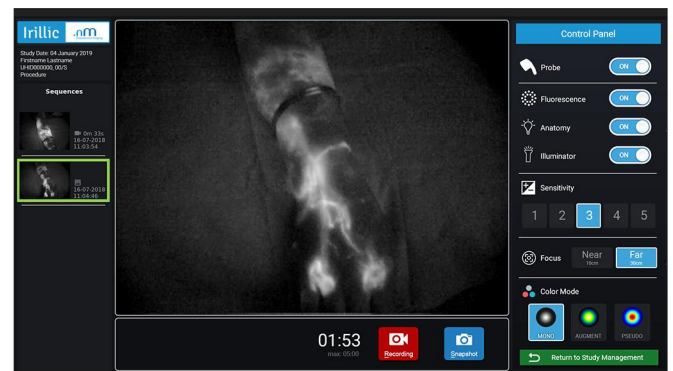

Key Features:

- Hand-held NIR imaging probe with 5-button control for independent use.
- Integrated Patient Management and Acquisition Management Software.
- In-built storage for images and videos with data archiving, reviewing and data export.
- Multiple color augmented fluorescence modes for different applications.
- Intelligent background/anatomy light adjustment.

Irillic .nm Software

Patient Management Software

Acquisition Management Software

Irillic .nm comes with a Patient Management Software and an Acquisition Management Software that helps users to save, review and export patient scans.

See Better. Treat Better.
